

सस्टेनेबल फ्यूचर को बढ़ावा देने की पहल

गुड़गांव, 14 नवम्बर (ब्यूरो): फैसिलिटीज मैनेजमेंट कंपनी एनवायरो इंडिया ने हाल ही में घोषणा की है कि उसने दिल्ली एनसीआर में अपनी कमर्शियल व आवासीय संपत्तियों में अब तक 1098 सौर पैनल स्थापित किए हैं।

इस पहल ने प्रति दिन 4,941 केडब्ल्यूपी यूनिट ऊर्जा का उत्पादन करके ऊर्जा खपत की लागत को कम करने में महत्वपूर्ण योगदान दिया है। इंस्टालेशन और मेंटेनेंस में 20 से अधिक वर्षों के अनुभव के साथ एनवायरो की तकनीकी टीम ने सभी सोलर पैनल बिना किसी अड़चन के स्थापित किए।

सामाजिक रूप से टिकाऊ पहलों के लिए अंतरराष्ट्रीय स्तर पर प्रशंसित एनवायरो इंडिया ने भारत के विभिन्न शहरों में स्थित विभिन्न परियोजनाओं में 5 करोड़ से अधिक का निवेश किया है। भविष्य के क्षितिज की ओर देखते हुए फर्म ने जर्मनी व ताइवान जैसे देशों से बैटरी व पैनल में नवीनतम तकनीक प्राप्त करने की योजना की रूपरेखा तैयार की है।

Latest News | Business Briefs Enviro India Installs 1,098 Solar Panels in Delhi-NCR

Get latest articles and stories on Latest News at LatestLY. Gurugram-based facilities management company Enviro India said it has installed 1,098 solar panels to date in its commercial and residential properties across Delhi-NCR.

Gurugram, Nov 14 (PTI) Gurugram-based facilities management company Enviro India said it has installed 1,098 solar panels to date in its commercial and residential properties across Delhi-NCR.

The initiative has contributed significantly to mitigating energy consumption costs by producing 4,941 kWp units of energy per day.

"Enviro has been installing solar panels since 2013 to help India achieve a low-carbon, sustainable future. The ideal geographical location of India makes it one of the leading solar power generators in the world, and we have leveraged this advantage to generate 1,22,23,305 kWp of electricity through our solar installations," Enviro India CEO and President Ajay Kumar Singh.

Further, Singh said "the scale of our operations gives us the confidence to pass on the cost-benefit to our clients and make it cost-positive for them over time. We look forward to offering our expertise to other organisations in procurement, deployment, maintenance, and operations of solar panels".

*** PTC India Financial Services signs pact with IIT Delhi * PTC India Financial Services Ltd on Monday said it has entered into an agreement with IIT Delhi to educate students in the areas of climate finance and renewable energy.

The Memorandum of Understanding (MoU) is for 10 years, PTC India Financial Services Ltd said in statement.

"This will give students first-hand exposure to key industry trends in green energy economics, climate finance, and renewable energy," the statement said.

*** IndiaRF invests Rs 550 crore in Impresario Entertainment and Hospitality * Piramal Enterprises and Bain Capital-promoted India Resurgence Fund (IndiaRF) on Monday said it has made an investment of Rs 550 crore in Impresario Entertainment and Hospitality.

Following the transaction, IndiaRF has become the majority shareholder of Impresario, the company said in a statement.

The fresh capital will be utilised for further expansion of Impresario's business, which also received an investment from L Catterton in 2017.

"We plan to work alongside and augment the efforts of the management team, by leveraging on our deep operational engagement across multiple sectors," IndiaRF Managing Director Shantanu Nalavadi said.

*** Fintech platform CheQ to hire over 100 workforce * Fintech platform CheQ on Monday said it is planning to hire over 100 employees in the near term and plans to expand its engineering and product teams.

The company, which currently employs 50 people, is actively hiring software engineers, engineering managers, technical leads and product managers, it said in a statement.

"Our selection process revolves around the candidate's experience. We promise tremendous speed in the hiring process, along with exposure to our leadership, industry competitive compensation and finally a smooth integration into the exciting world of fintech," CheQ Founder and CEO Aditya Soni said.

Enviro India installs 1098 solar panels across its project to promote a sustainable future

The firm has outlined plans to source the latest technology in battery and panels from countries like Germany and Taiwan

Enviro India, a facilities management company based in Gurugram, has installed 1098 solar panels to date across its commercial and residential properties across Delhi-NCR. The initiative has contributed significantly to mitigating energy consumption costs by producing 4,941 kWp units of energy per day.

Enviro India has invested over Rs 5 crore in various projects located at different cities in India. Looking towards future horizons, the firm has outlined plans to source the latest technology in battery and panels from countries like Germany and Taiwan.

Ajay Kumar Singh, CEO & president, Enviro India, said, "Enviro has been installing solar panels since 2013 to help India achieve a low-carbon, sustainable future. The ideal geographical location of India has helped it leverage this advantage to generate 1,22,23,305 kWp of electricity through our solar installations."

Enviro has been installing solar panels since 2013 to help India achieve a low-carbon, sustainable future

Gurugram: Enviro India, a renowned facility management company based in Gurugram, recently announced that it has so far installed 1098 solar panels on its commercial and residential properties across Delhi-NCR. The initiative has significantly reduced energy consumption costs by generating 4,941 kWp of energy units per day.

With over 20 years of installation and maintenance experience, Enviro's technical team ensured the panels were installed smoothly. Enviro India is internationally known for its socially sustainable initiatives and has invested over 5 Crores in various projects in different cities of India. Looking ahead, the company has outlined plans to source the latest battery and panel technology from countries like Germany and Taiwan.

Commenting on this initiative, Ajay Kumar Singh, CEO and President of Enviro India said:

"Enviro has been installing solar panels since 2013 to help India achieve a low-carbon, sustainable future. India's ideal geographic location makes it one of the leading solar power producers in the world and we have taken advantage of this to generate 1,22,23,305 kWp of electricity from our solar arrays. The scale of our business gives us the confidence to pass value on to our clients and make it cost positive to them over time. We look forward to offering our expertise to other organizations in solar panel sourcing, deployment, maintenance and operations."

As the world moves towards more sustainable energy sources, solar energy is a viable way to reduce dependence on fossil fuels and achieve independence. This Enviro India initiative will prove extremely effective as India aims to replace fossil fuels with renewable energy in the foreseeable future.
